ABOUT US

At SM EXIMS, we specialize in manufacturing high-quality leather safety shoe uppers designed for strength, durability, and long-term performance.

Based in Kanpur, India — one of the country's leading leather hubs — we bring over three decades of industry experience into every product we create.

While SM EXIMS is a new venture, our foundation is built on years of hands-on expertise, deep material understanding, and a commitment to consistent quality.

From material selection to final stitching, every upper is developed with precision to meet the demands of modern safety footwear.

We focus on delivering products that not only meet expectations but perform reliably in real working conditions.
